## B BancoBM

Financial Statements June 30, 2010 and 2009 with Report of Independent Auditors Macroeconomic Scenario

The Brazilian economy presented two distinct moments in the first half of 2010. The rise in GDP strongly accelerated in 1Q10, reaching 11.4% in annual terms, when compared to the previous quarter. Such expressive result was obtained even after two quarters of elevated growth: GDP had risen 9.0% and 9.3% in annual terms in 3Q09 and 4Q09, respectively. Given the robust performance of Brazilian economy, there was increased pressure on production factors: the level of use of installed capacity by the industry was close to the maximum point, whereas the unemployment rate, according to the Brazilian Institute of Geography and Statistics (IBGE), reached minimum historical levels.

In the second quarter, on the other hand, economic activity showed clear signs of slowdown. Part of this process was a result of removal of tax incentives for consumption: extended retail market sales (which includes cars and civil construction) fell by 1.9% against the prior quarter, after having increased 5.6% in 1Q10. Nevertheless, part of the slowdown is a natural process, after a quarter of accelerated expansion. A detailed analysis of the industry data shows, for example, that a significant part of the slowdown in this sector regards activities not related to tax incentives, such as production of non-durable goods, which strengthens the above conclusions. Such a positive performance of sectors related to investment in the 2Q10 strengthens the idea of a temporary slowdown in consumption, which, however, does not undermine the expectations of businessmen - the growth rate of internal absorption of capital goods, for example, increased from 4.8% in 1Q10 to 6.5% in 2Q10.

Similarly to the economic activity, inflation showed distinct scenarios in the  $1^{\rm st}$  and  $2^{\rm nd}$  quarters of 2010. In 1Q10, inflation surprisingly increased: accumulated IPCA (Extended Consumer Price Index) reached 2.06%, 43 base points above the average of 2004-2009. This was mostly due to food price behavior, registering inflation of 3.68% in 1Q10, 170 base points above the average of 2004-2009. Short-term inflation registered an even higher inflection than the economic activity in 2Q10, with an IPCA of 1.0%, 27 base points lower that the average of 2004-2009. As in 1Q10, food led the change in inflation, reaching 0.82%, 79 base points lower than the average of 2004-2009. However, core inflation shows less reduction than the IPCA registered in 2Q10. Service, in particular, continued under considerable pressure. This suggests that underlying inflation remained reasonably high, which should lead to an increase in the IPCA, especially from 4Q10 onwards.

In view of the above scenario, the Central Bank of Brazil decided to implement a more aggressive monetary policy adjustment process, increasing the Central Bank Overnight Rate (SELIC) by 75 base points for two consecutive meetings. Such a reaction was also justified by a significant fall in inflation expectations: according to the FOCUS survey, the IPCA median projected for 12 months rose from 4.51% just before the Monetary Policy Committee (COPOM) meeting held in January to 4.72% in the COPOM meeting of June. The reduction in the economic activity data and in inflation as described above, in conjunction with the perspective of slowdown in world economy growth, contributed to weakening the risks associated with the prospective inflation scenario, leading the Central Bank of Brazil to reduce the rhythm of increase in the SELIC rate to 50 base points in the meeting held in July 2010.

#### Our Business

Banco BBM's activities are focused on Corporate Credit, Treasury and Asset Management. The Bank has a solid relationship with its clients, an efficient business platform, risk control and significant experience in research for the development of its activities.

We rely on a solid and transparent governance structure based on a stock participation program implemented in 1995, whereby our main executive officers hold a relevant stock participation, currently representing one third of our capital stock.

We focus on providing financial services for companies and individuals, offering our clients with a large portfolio of products, services and customized financial solutions, supported by highly qualified treasury services.

Performance of the Banco BBM Financial Group

The Banco BBM Financial Group closed the first half of 2010 with shareholders' equity of R\$ 649 million, and net income of R\$ 23,8 million, representing an annual profitability of 7.3%, calculated on average shareholders' equity for the period.

Total assets at the year end was of R\$ 5 billion. The volume of domestic and foreign market funding at the end of the period was of R\$ 1,2 billion. The Bank's Basel index was 20.7% at the end of the six-month period.

#### Loans to Companies

The loan portfolio at the end of six-month period totaled R\$ 820 million (including advances on foreign exchange contracts, leasing and guarantees given through sureties, guarantees and letters of credit).

#### Treasury

Our treasury activities aim at maintaining capital as the fundamental principle and, as such, prudent risk management over generation of high yields is a priority. The area also operates as a platform, providing technical support and market know-how to the other Bank areas.

Decisions about fund allocation are taken by committees, and focus mainly on the Research and Risk Control areas. The Bank has a high degree of technological qualification in research, as well as sophisticated risk control systems, which have been successfully used since 1995. The market risk control area reports directly to the Bank's CEO.

#### Asset Management

Asset management is mainly focused on active management of investment products (Multimarket, Fixed and Variable Income Funds) for distributors (34%), companies and pension funds (13.5%) and rendering of distinct asset management services to individual clients (52.5%).

Managed funds at June 30, 2010 amount to R\$ 6 billion, and include multimarket (77.4%), fixed income fund (11.4%) and variable income fund (11.2%).

#### Human Capital

Our policy is based on systematic investment in recruiting, training and motivating our team. The Bank's philosophy is to hire highly qualified professionals, offering them a challenging and meritocratic work environment through performance assessment, which is an important tool for the achievement of our goals. Our entire team is entitled to profit sharing, calculated based on evaluations carried out by management. Career development within the organization is one of our main staff motivation factors.

#### Credit Ratings

In the Bank's view, the international credit rating agencies are an important source of transparent and independent assessment of the quality of our credit. The classification given by Fitch Ratings is "A" in local currency and the classification of Moody's Investor Services is "Bal" for the local currency and "Aa2.br" on the national scale.

### **Report of Independent Auditors**

The Board of Directors and Shareholders Banco BBM S.A.

We have audited the accompanying balance sheets of Banco BBM S.A. and the consolidated balance sheets of the Banco BBM Financial Group (Operational Consolidated) as of June 30, 2010 and 2009, and the related statements of income, changes in shareholders' equity and cash flows for the six-month periods then ended. These financial statements are the responsibility of the Bank's management. The consolidated financial statements of Banco BBM Financial Group were prepared solely for compliance with the requirements of the Central Bank of Brazil, in accordance with the criteria described in Note 4. Our responsibility is to express an opinion on these financial statements.

We conducted our audits in accordance with generally accepted auditing standards in Brazil which comprised: a) the planning of our work, taking into consideration the materiality of balances, the volume of transactions and the accounting and internal control systems of the Bank and Consolidated, b) the examination, on a test basis, of the documentary evidence and accounting records supporting the amounts and disclosures in the financial statements, and c) an assessment of the accounting practices used and significant estimates made by management of the Bank and Consolidated, as well as an evaluation of the overall financial statements presentation.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Banco BBM S.A., as well as the consolidated financial position of the Banco BBM S.A. Financial Group at June 30, 2010 and 2009, and the results of operations, changes in shareholders' equity and cash flows for the six-month periods then ended, in accordance with the accounting practices adopted in Brazil applicable to institutions authorized to operate by the Central Bank of Brazil.

#### 1 Operations

Banco BBM S.A. is leader of the Banco BBM Financial Group (Note 4), being authorized to operate as a multiple bank in the following portfolios:

Commercial
Investment
Loan, financing and investment
Foreign exchange
Lease

The Bank's and the Financial Group's operations are carried out in the context of a group of institutions which operate together in the financial market and certain operations have co-participation or intermediation of associated institutions which are part of the Banco BBM Financial Group. The benefits from services rendered among such institutions and the costs of the Financial Group's operating and administrative structures in common are fully or individually absorbed, on a basis that is practical and reasonable in the circumstances.

#### 2 Presentation of financial statements

The financial statements of Banco BBM S.A., including its foreign branch, and of the Banco BBM Financial Group (Note 4) were prepared in accordance with accounting practices derived from the Brazilian Corporation Law, considering the changes introduced by Law No. 11.638 and by the Provisional Executive Order (MP) No. 449 as from 2008, and regulations and instructions of the Central Bank of Brazil (BACEN), and are presented in conformity with the Chart of Accounts for Institutions of the National Financial System (COSIF).

The first-time adoption of Law No. 11.638 has not generated any significant adjustments to the Bank's and the Financial Group's financial statements, as the major changes from the new legislation which impact their operations had already been adopted according to current accounting standards set forth by the Central Bank of Brazil (BACEN).

The authorization for conclusion of these financial statements was given by the  $Bank's\ Board$  of Directors on August 20, 2010.

- 3 Significant accounting practices
- (a) Profit and loss

Profit and loss are recorded on an accrual basis.

(b) Marketable securities and derivative financial instruments

In accordance with BACEN Circular No. 3.068, securities are classified into the following categories:

- I- Trading securities;
- II- Available for sale securities; and
- III- Held to maturity securities;

Securities classified in categories I and II are adjusted to market value. For trading securities, this adjustment is recorded in P&L and for available for sale securities it is recorded in a specific account in shareholders' equity, net of tax effects. Securities classified as held to maturity are recorded at cost plus accrued interest.

Derivative financial instruments are adjusted to market value, in accordance with BACEN Circular No. 3.082.

#### (c) Current and non-current assets

These are stated at realization values, including, when applicable, earnings and monetary (on a daily pro-rata basis) and foreign exchange variations, less unearned income and/or allowance for losses.

Balances maturing within 12 months (or 360 days) are classified as current assets.

#### (d) Permanent assets

Stated at cost combined with the following aspects:

- Significant investments in subsidiaries are accounted for by the equity pickup method;
- Property and equipment and leased assets are depreciated on the straight-line basis, at annual rates which take into account the useful lives of the assets, as follows: property in use - 4%; furniture and fixtures, machinery and equipment - 10%;
- Amortization of deferred charges, represented mainly by leasehold improvements, over the lease term.

In accordance with Resolution No. 3.617/08 issued by the National Monetary Council (CMN), financial institutions must record as deferred charges only the pre-operating expenses and restructuring costs that will actually contribute to increasing net income for more than one fiscal year and that do not represent only a reduction in costs or an increase in operational efficiency. This Resolution also allows institutions to keep those balances existing as of September 30, 2008 until their write-off.

#### (e) Current and non-current liabilities

Stated at known or estimated values, including, when applicable, accrued charges, monetary and foreign exchange variations (on a daily pro rata basis), less unaccrued expenses. Balances maturing within 12 months (or 360 days) are classified as current liabilities.

#### (f) Income and social contribution taxes

The provision for income tax is calculated on taxable profit at a 15% rate, plus 10% surtax on income in excess of R\$240 thousand for a period of 12 months. Social contribution tax is calculated at the rate of 15%.

The deferred tax assets and liabilities arising from temporary differences were recognized in accordance with Resolution No. 3059 issued by the National Monetary Council (CMN) on December 20, 2002, and Resolution No. 3.355, issued by the CMN on March 31, 2006, and take into account the history of profits and the expectation of future taxable income supported by technical feasibility studies. The deferred taxes were recognized based on the expected income and social contribution tax rates of 25% and 15% respectively

#### (g) Swaps, futures, forward and options

The nominal amounts of contracts are recorded in memorandum accounts. The daily adjustments of operations carried out in the futures market are recorded as effective income or expense when earned or incurred. Premiums paid or received in option transactions are recorded in the related balance sheet accounts at cost, and marked-to-market with the resulting gains and losses recognized in P&L for the period. The fair value of swap and forward transactions are individually recognized in balance sheet accounts, with the resulting gains and losses recognized in the related income and expense accounts.

(h) Earnings per share

Calculated based on the number of shares outstanding at the balance sheet dates.

(i) Impairment of assets

In accordance with CPC 01, as approved by CMN Resolution 3.566, of May 29, 2008, and based on management analysis, an impairment loss is recognized in the income statement if the book value of the Bank's and its subsidiaries' assets exceeds the related recoverable value.

(j) Contingent assets and liabilities and legal, tax and social security obligations

Recognition, measurement and disclosure of contingent assets and liabilities and legal obligations are made pursuant to the criteria defined below:

Contingent assets - These are only recognized in financial statements upon existence of evidence guaranteeing their realization, on which no further appeals can be filed.

Contingent liabilities - These are recognized in the financial statements when legal counsel and management rate the likelihood of an unfavorable outcome for a lawsuit or administrative proceeding as probable and the amounts involved are measurable with sufficient safety. Contingent liabilities considered as possible losses by the legal counsel are only disclosed in the notes to the financial statements, whereas those rated as remote do not require any provision or disclosure.

Legal obligations - tax and social security - These refer to legal claims whereby lawfulness and constitutionality of certain taxes and contributions are under dispute. The amount at issue is quantified and recorded.

4 Consolidated financial statements (Operational consolidated)

The consolidated financial statements were prepared in conformity with the consolidated principles set forth by BACEN, which require the inclusion of all of the financial institutions belonging to the same financial group, irrespective of intercompany shareholdings.

The operational consolidated process involving balance sheet and profit and loss accounts corresponds to the horizontal addition of balances of assets, liabilities, revenues and expenses accounts, according to their nature, with the following eliminations:

- Shareholding interest, reserves and retained earnings between institutions, there being no reciprocal holdings;
- Current account balances and other asset and/or liability accounts maintained between institutions, whose balance sheets were consolidated;
- Effects of significant operations conducted among such institutions.

The Operational Consolidated comprises the financial statements at June 30, 2010 and 2009 of the following institutions:

Banco BBM S.A. and the Nassau branch BBM Bank Ltd. (a) BBM Corretora de Câmbio e Valores Mobiliários S.A. (b) BBM Administração de Recursos DTVM S.A. (b)

- (a) Banco BBM S.A. holds directly 15.15%, and indirectly 84.85% of the capital stock of this institution. Together these direct and indirect interests aggregate 100%, and are eliminated in the consolidation process (Note 9).
- (b) Banco BBM S.A. holds directly 100% of the capital stock of these entities.

The market values of securities are determined based on quoted market prices at the balance sheet date, when available, or using price valuation techniques.

<sup>(\*)</sup> At June 30, 2010, trading securities maturing after 12 months are classified as current assets in accordance with BACEN Circular 3068/01 and totaled R\$ 10,291 thousand, Bank and Consolidated (June 30, 2009 - R\$ 2,234,174 thousand, Bank, and R\$ 2,235,478 thousand, Consolidated). Securities available for sale maturing after 12 months are classified as non-current assets irrespective of their liquidity, in accordance with BACEN Circular 3068/01, and amounted to R\$ 40,037 thousand at June 30, 2010, Bank and Consolidated (June 30, 2009 - R\$ 4,377,400 thousand, Bank and Consolidated). The effect of this classification in the working capital is shown in Note 21 - Liquidity risk.

7 Loans, lease, sureties and guarantees

At June 30, 2010 and 2009, loans, lease and guarantees provided through sureties or guarantee agreements by the Bank and the Operational Consolidated, classified according to the clients' economic activities, are as follows:

	In thousands of R\$

Total	820,115	1,918,682	820,115	1,918,682		

- (a) The advances on foreign exchange contracts and the related income receivable are classified as reduction accounts of Other Liabilities Foreign exchange portfolio and Other Receivables Foreign exchange portfolio, respectively, as shown in Note 8.
- (b) Refer to guarantees provided through sureties, guarantee agreements and import letter of credit. Guarantees provided are recorded in memorandum accounts and the related income is recorded in Deferred Income and recognized in net income according to their maturity terms. The Bank's balances also include guarantees provided for loans from Bank Limited, which are eliminated in the Operational Consolidated.
- (c) The lease receivables were calculated using internal rate of return for each contract, in accordance with BACEN Circular 1.429/1.989 and in order to share specific accounting principles such as present value of future cash flows of the lease portfolio.
- (d) These refer also to purchase of real estate portfolios.

The leased assets are committed to be sold to the lessees for the amount of R\$ 514 thousand (June 30, 2009 - R\$ 514 thousand). The lease receivables are guaranteed by the leased assets, and the contracts contain compulsory insurance clause in favor of the lessor.

At June 30, 2010 and 2009, loans, lease and guarantees provided through sureties and guarantee agreements, Bank and the Operational Consolidated, were segregated by the following payment terms, grouped according to the due date of the installments:

	In thousands of R\$						
	Ban	k	Operational	consolidated			
	6/30/2010 6/30/2009		6/30/2010	6/30/2009

Total	820,115	1,918,682	820,115	1,918,682			

The allowance for loan and lease losses was calculated according to the criteria established by Resolutions 2.682 and 2.697 of the National Monetary Council, based on the risk classification of the transactions and the amounts in arrears.

The classification of loans in the Operational Consolidated can be shown as follows:

	In thousands of R\$					
	Balan	ice	Provision %	Provi	sion	
Risk levels	6/30/2010	6/30/2009		6/30/2010	6/30/2009	
AA	123,494	214,419	-	-	-	
Α	140,927	555,272	0.50%	705	2,776	
В	211,952	611,529	1%	2,119	6,115	
С	108,824	362,030	3%	3,265	10,861	
D	33,450	14,056	10%	3,345	1,406	
E	43,416	7,944	30%	13,025	2,383	
F	28,740	89,838	50%	14,370	44,919	
G	202	17,892	70%	141	12,525	
Н	129,110	45,702	100%	129,110	45,702	
Total	820,115	1,918,682	_	166,080	126,687	

The quality of loans in the Operational Consolidated can be demonstrated by the following main indexes:

	6/30/2010	6/30/2009	
Percentage of allowance for loan losses/Total loan portfolio	20.25%	6.60%	
Percentage of allowance for loan losses/Shareholders' equity	25.59%	16.66%	
Percentage of D-H loans/Total loan portfolio	28.64%	9.14%	
Percentage of D-H loans/Shareholders' equity	36.19%	23.07%	
Percentage of (D-H loans – allowance for loan losses)/Total loan portfolio	8.39%	2.54%	
Percentage of (D-H loans – allowance for loan losses)/Shareholders' equity	10.60%	6.41%	
Leverage (Total loan portfolio/Shareholders' equity)	1.26	2.52	

The allowance above is presented in the Operational Consolidated as follows:

	In thousands of R\$	
	6/30/2010	6/30/2009
Allowance for loan losses	42,585	94,869
Current assets	31,091	90,397
Non-current assets	11,494	4,472
Allowance for lease losses	-	78
Current assets	-	31
Non-current assets	-	47
Allowance for other receivables		
Allowance for advances on foreign exchange contracts	40,513	28,177
Current assets	40,510	28,159
Non-current assets	3	18
Allowance for guarantees and risks	82,982	3,563
Current assets	664	2,520
Non-current assets	82,318	1,043
Total	166,080	126,687

The changes in allowance are as follows:

	In thousands of R\$		
	6/30/2010		
Balance at January 1	176,008	78,184	
Set up / (reversal)	5,861	50,203

- (a) Financial statements audited or reviewed by our independent auditors.
- (b) Similarly to the Nassau branch, the business purpose of BBM Bank Ltd., located in the Bahamas, is to facilitate operations of the Banco BBM Financial Group in the international financial market.

In addition to the direct interest, Banco BBM S.A. has an indirect interest in BBM Bank Ltd. of 84.85% through the subsidiary The Southern Atlantic Investments Ltd.

The direct interest of Banco BBM S.A. in BBM Bank Ltd. does not comprise all of its subsidiary's equity accounts. Therefore, the book value of the investment does not correspond, directly, to the participation in the adjusted shareholders' equity balance as of June 30, 2010 and 2009.

(c) Refers partly to the foreign exchange on the Nassau branch equity, not eliminated in the consolidation process.

- (a) Financial statements reviewed by our independent auditors.
- (b) The indirect interest of 84.85% held by Banco BBM S.A. in the capital of BBM Bank Ltd. has been eliminated in the Operational Consolidated in the line "Subsidiaries The Southern Atlantic Investment Ltd". In the six-month period ended June 30, 2010, such elimination produced the following effects in the Operational Consolidated: reduction of permanent investments by R\$ 429,351 thousand (June 30, 2010 and 2009 632,288 thousand), and reduction in equity pickup of R\$ R\$ 8,059 thousand (June 30, 2009 R\$ 29,443 thousand).
- (c) Equity variations of subsidiaries, such as the effects of foreign exchange variations on offshore investments, restatement of membership certificates and prior-year adjustments, when applicable, are mostly shown as "Other" in the Operational Consolidated, and are not eliminated.
- (d) At December 31, 2009, BBM Gestão de Recursos Ltda. was merged by Banco BBM S.A. in order to reduce operating costs generated by keeping an independent corporate entity, as well as simplification of the corporate structure. At present, the merger operation is at the registration stage with the relevant authorities.

  With the merger of this corporate entity, fund management activities began to be carried out directly by Banco BBM S.A. In our interpretation of the segregation regulations ("Chinese wall") of the CVM, which regulates asset management, independence is considered to be the effective physical and business segregation of the management business as regards Proprietary Treasury, so that the referred to merger is not in any way in contravention of these standards.
- (e) BBM Investment Management Services, based in the Cayman Islands, was set up in March 2006 through a capital payment of US\$ 50 thousand, in order to provide investment fund management services on the international market.

- 15 Shareholders' equity
- (a) Capital is of 257,560,034 registered shares with par value of R\$ 1.60 each, represented by 172,156,270 common shares and 85,403,764 preferred shares.
- (b) Legal reserve

This reserve is calculated at the rate of 5% of the net income at each balance sheet, up to the limit determined by the Corporation Law of 20% of Capital.

(c) Statutory reserve

In accordance with the Bank's articles of incorporation, this reserve represents the remaining balance of net income at each balance sheet date, after the legal allocations.

(d) Treasury stock

At June 30, 2010, Banco BBM has 8,241,636 shares held in treasury, in the amount of R\$ 21,059 thousand. On January 29, 2010, Banco BBM purchased 5,794,816 PN shares at the unit value of R\$2.23, held in treasury.

(e) Interest on equity capital

In accordance with article 9 of Law 9.249/95 and subsequent regulations, Banco BBM S.A., at June 30, 2010, declared the amount of R\$ 19,397 thousand (June 30, 2009 - R\$ 22,705 thousand) for purposes of interest on equity, with Withholding Income Tax of R\$ 2,910 thousand (1st half of 2009 - R\$ 3,406 thousand), calculated at 15%. The amount was determined in accordance with the legal limits in force, and recorded as "Other operating expenses".

For purposes of publication of the Statement of Income, as established by BACEN Circular No. 2.739, the expense related to the payment of interest on equity capital was adjusted by a reclassification to retained earnings, and recognized in the statement of changes in shareholders' equity as an allocation of income.

The interest on equity capital proposed in the first half of 2010 reduced the tax burden by R\$ 7,759 thousand (1<sup>st</sup> half of 2009 - R\$ 9,082 thousand).

#### (f) Dividends

In accordance with the Bank's articles of incorporation, the shareholders are entitled to minimum dividends of 25% of net income for the year, after specific allocations.

#### 20 Derivative financial instruments

The Bank and the other Operational Consolidated institutions participate in operations involving derivative financial instruments to meet their own needs well as on behalf of their clients.

Derivative financial instruments are classified according to management's intent at the inception of the transaction, taking into consideration whether or not the purpose is to hedge risks.

In accordance with BACEN Circular 3.082, derivative financial instruments designated to compensate, in whole or in part, exposure to risks from assets, liabilities, commitments or projected future transactions (hedged item) are classified as hedge instruments if they are considered effective in reducing the risk associated with the exposure of the hedged item, according to their nature:

- Market risk hedge hedged items and related derivative financial instruments are recorded at market value and corresponding appreciations or devaluations are posted to P&L for the period; and
- Cash flow hedge hedged items and related derivative financial instruments are recorded at market value, and corresponding appreciations or devaluations, net of tax effects, are posted to the separate shareholders' equity account "Market value adjustment marketable securities and derivative financial instruments", up to realization of the hedged item. The non-effective portion of the hedge is recognized directly in P&L for the period.

In addition, there are "macro hedging" operations to hedge all or part of the net exposure of Operational Consolidated to interest rate and foreign exchange risks, and also operations with directional positions. Management of these risks is carried out through policies that define the operation's strategy, as well as controls to monitor and define position limits. These operations do not comply with the definition of "hedge accounting" as established by Circular 3.082 of the Central Bank of Brazil.

The operations are traded, registered or held in custody at the Brazilian Securities, Commodities and Futures Exchange – BM&F – or the OTC Clearing House – CETIP. In the Operational Consolidated, operations with international derivatives are traded at and registered in the Chicago Board of Trade – CBOT – or the Chicago Mercantile Exchange – CME.

The criteria used to calculate the market value of the derivative financial instruments are:

- Futures: the daily adjustment of the transactions;
- Swaps and forward: the cash flow of each component is estimated and discounted to present value, according to related interest yield obtained based on BM&F's prices or prices of the underlying assets;
- Options: average trading price on the calculation date or, when not available, estimated price based on pricing models, such as Black & Scholes.

The guarantees involved in the operations with derivative financial instruments are represented mainly by sureties and government securities in the total amount of R\$ 147,338 thousand (June 30, 2009 - R\$ 229,611 thousand).

The commitments assumed as a result of these financial instruments, as recorded in memorandum accounts at June 30, 2010, mature up January 2017 (June 30, 2009 - up to January 2017), and may be summarized as follows:

#### Swaps and Forward - Bank

### Hedge accounting

At June 30, 2010, derivative financial instruments classified as market risk hedge, adjusted, represented by future foreign exchange coupon contracts amount to R\$ 280,044 thousand, Bank and Operational Consolidated (June 30, 2009 - R\$ 297,983 thousand). Hedged items are liability transactions subject to foreign exchange coupon variation. These operations were adjusted to market value resulting in gains, net of taxes, in the amount of R\$ 360 thousand, Bank and Operational Consolidated (June 30, 2009 - loss, net of taxes, of R\$ 10,246 thousand), posted to P\$L for the year.

The hedge effectiveness of the hedge has been tested, as required by the Central Bank of Brazil.

#### 21 Risk management

#### Market risk

Banco BBM has a market risk management structure comprised of the following agents, with their respective functions: a) the Executive Board, responsible for reviewing risk management policies and proposing risk management operational limits, submitting these to the approval of the Board of Directors at least annually; b) Board of Directors, which approves the risk policies and limits at least annually; c) the Market Risk area, reporting to the Bank's Chief Risk Officer, is responsible for identifying, measuring, monitoring and informing the Bank's market risk to the Board of Directors, on a daily basis, ensuring compliance with the market risk management policy, as well as guaranteeing that operational limits are observed; d) the Price department, which among other duties is responsible for defining the price models and sources used in mark-to-market adjustments of traded products, independently from managerial departments; e) Internal Audit, which is responsible for ensuring the adequacy of procedures and the consistency between market risk management policies and the structure actually implemented. A full description of the Bank's risk management structure is available on Banco BBM's website (www.bancobbm.com.br).

BBM'S market risk is monitored through daily calculations of the Value at Risk (VaR \*), a statistical tool that measures the institution's maximum potential loss at a given confidence level over a given investment horizon. A stipulated VaR limit may be allocated by the Chief Treasury Officer among the various risk factors. The VaR calculation model is subjected to back testing on a regular basis. Additionally, scenario analyses are conducted daily, as monthly defined by the Risk Committee, independently from managerial departments.

\*VaR = Maximum potential loss given a probability and an investment timeframe. As for BBM, the limit is based on a 95% probability to lose a maximum 2% of its net equity over one day.

#### Liquidity risk

Liquidity risk is managed based on cash flow forecasts, considering different scenarios of funding, loan and treasury operations. The management policy, as defined by the Management Committee, establishes scenarios in which: a) funding operations are considered only up to first-term liquidity; b) cash inflows consider each client's underlying risk; c) assumptions are made regarding additional cash requirements to meet compulsory deposits obligations, derivatives adjustments and other obligations. The general principle is to ensure that the Bank's commitments match net equity and current funding, loan and treasury policies.

Credit risk

The credit risk evaluation process of each company and/or economic group focuses on the ability to generate profits, market share, quality of its control, indebtedness level, and management strategy and commitment.

Credit limit recommendations are submitted to a formal approval process, by a credit committee which includes, among others, the Chief Risk Officer, at least one Executive Director and a member of the Board of Directors. Credit limits approved are mostly valid for up to 90 days.

Operational risk

Banco BBM has implemented an operational risk management structure based on the best market practices and in compliance with regulatory requirements in force.

The structure is documented in the internal manual "Policy on Operational Risk Management" which describes the methodology, management process, roles and responsibilities, categories, information storage and documentation procedures, and also the disclosure process in order to ensure the transparency of management activities. A full description of the operational risk management structure is available on the Bank's website (www.bancobbm.com.br).

The Operational Risk Department is an independent organizational unit segregated from the internal audit department, led by the Risk Manager and reporting to the Chief Risk Officer, and is responsible for enforcing the guidelines of the Operational Risk Policy together with the other components of the operational risk structure in order to ensure compliance therewith.

### 22 Operational limits

In July 2008, the new rules related to capital measurement became effective. Financial institutions and similar entities are required to maintain minimum equity of 11% of their assets weighted by levels of risk to exposures in gold, foreign currency and operations subject to operational risk and changes in: exchange rates, interest rates, commodities prices and stock prices classified as trading securities, in accordance with rules established by BACEN. The Bank's Operational Consolidated statements fall into this operational limit at June 30, 2010.

#### 24 Provisions and liabilities for legal obligations

The Bank and the Banco BBM Financial Group are parties to judicial and administrative proceedings, arising from the normal course of operations, involving tax, labor, civil and other issues.

#### a) Breakdown of provisions

Based on information from legal advisors, analysis of the pending legal proceedings, and previous experience with regard to amounts claimed in labor claims, management recorded provisions for amounts considered sufficient to cover possible losses from the current actions, as follows:

	In thousands of R\$					
	Bank		Operational Consolidated			
	6/30/2010	6/30/2009	6/30/2010	6/30/2009		
Civil	510	510	510	510		
Labor	5,133	2,940	5,133	2,940		
Total – Provisions for contingencies	5,643	3,450	5,643	3,450		

Provisions are registered as "Other Liabilities - Sundry" under non-current liabilities. During the six-month period ended June 30, 2010, a provision for contingencies of R\$ 1,628 thousand was set up in the Bank and Operational Consolidated.

### **b)** Liabilities for legal obligations

Since April 2007, based on a preliminary court order in connection with contesting the constitutionality of the law that increased the PIS and COFINS tax bases, Banco BBM and BBM CCVM have been paying said taxes calculated only on income from services rendered, recording a liability for the remaining balances until a final decision is handed down, recorded as "Other Liabilities - Sundry" under non-current liabilities as follows:

		In thousands of R\$						
	Bank		Operational Consolidated					
	6/30/2010	6/30/2009	6/30/2010	6/30/2009				
PIS and COFINS Total – Liabilities for legal obligations	59,619 <b>59,619</b>	46,923 <b>46,923</b>	61,188 <b>61,188</b>	47.924 <b>47.924</b>				

In the first half of 2010, the total amount of R\$ 7,645 thousand was set up in the Bank, of which R\$ 1,988 thousand is restated based on the SELIC. In Operational Consolidated the amount of R\$ 7,781 thousand was set up, of which R\$ 2,041 is restated based on the SELIC.

#### 25 Asset management

At June 30, 2010, assets under Banco BBM Financial Group's management totaled R\$ 6,604,199 thousand (June 30, 2009 - R\$ 4,246,328 thousand), of which R\$ 6,032,259 thousand (June 30, 2009 - R\$ 3,683,814 thousand) refers to funds, investment clubs and portfolios managed by the Group, and R\$ 571,940 thousand (June 30, 2009 - R\$ 562,514 thousand) to investment funds managed by third parties.

Income from management and performance fees are are recorded in the account "Income from services rendered" except for those earned by BBM Gestão de Recursos S.A. (merged on December 31, 2009, as mentioned in Note 9.d) and BBM Investment Management Services, which is a subsidiary of BBM Administração de Recursos DTVM S.A., not included in the Operational Consolidated as it is not considered a financial institution, as described in Note 4. Income from asset management is as follows:

	In thousands of R\$	
	6/30/2010	6/30/2009
Income from management and performance fees of investment funds included in the Operational Consolidated (a) Income from management and performance fees of investment funds included in related parties (b)	38,718 921	22,671 60,295
Total	39,639	82,966

- (a) See Note 17.
- (b) These investment fund management and performance fees are included in "Equity pickup" in the Operational Consolidated statement of income.
