Brazil: Inflation

» Inflation forecast revised to 4,8% in 2021, close to the target's upper limit

» Notwithstanding the benign inflationary path around the target, we see several upside risks in a situation where downside pressures have already been incorporated in the forecasts:

1. Further foreign exchange passthrough to industrial goods
2. Faster recovery of the service sector and consequently of the labor market
3. Additional pressure from commodities
4. Additional pressure from regulated prices

» However, a cycle of foreign exchange rate appreciation could mitigate these pressures

BRAZIL: MONETARY POLICY

» Our Selic rate projection was revised to 5,5% in the end of the year with the cycle's end in September

Brazil - CPI, Selic Rate and Real Ex-post Interest Rate

- » Measures to mitigate economic impacts from the pandemic elevated the primary deficit in 2020, but deficits should return to 3% of GDP in 2021 as the spending cap remains in place

- » Fiscal measures to mitigate economic fallout will result in a sharp rise in the Debt/GDP ratio
- » Important to keep the fiscal deterioration contained to 2020 and adhere to the spending ceiling in 2021

Brazil - Gross Debt as share of GDP

Brazil: Trade Balance

» Trade balance surprises upward with stronger exports to Asia and sharp decline in imports

Brazil: Trade Balance

»» Appreciation of commodity prices has not yet translated into a more appreciated Real

Brazil - Commodity Index vs BRL

Brazil: Balance of Payments

» Trade balance helping a reversal of the current account deficit for 2021

Current Account Balance - USD Billion
